Intel Embedded and Communications Alliance

Intel's Embedded and Communications Alliance is one of the world's most recognized embedded and communications ecosystems providing customers with a trusted supply line of Intel-based products and services offering benefits such as:

- Leading edge products, since all Alliance members get early access to the latest multi-core Embedded Intel Architecture processors
- Design and development expertise that will give you a head start in your design efforts
- Total lifecycle support from worldwide support organizations

BP Sales represents the following ECA partners:

[AAEON](#) — Embedded Single Board Computers, Fanless Embedded Controllers, Panel Appliance, and Industrial Systems Solutions. AAEON provides wallmount and rackmount chassis; full integration services, full-size and half-size SBCs. Custom capabilities.. <http://tinyurl.com/eca-aaeon>

[Advantech](#) — Embedded Computers, COM Modules, Industrial Motherboards, Pre-configured Systems, Ruggedized Solutions, Industrial Computer Chassis, Medical Computing, Panel PCs, Display Solutions, Digital Video Solutions, Self-service & Retail Intelligence, Vehicle Computing / Fleet Management, Bladed Computing Platforms, Gaming & POS Systems. <http://tinyurl.com/eca-advantech>

[congatec AG](#) – Manufacturer of COM Express, XTX, ETX, and Qseven Computer-On-Modules. Product portfolio is comprised of embedded computer boards and modules with BIOS tools for industrial use, professional board support packages, and extensive design-in support. <http://tinyurl.com/eca-congatec>

[DFI-ITOX](#) – ITOX Applied Computing is the United States affiliate of DFI, Inc. ITOX is a leading supplier of x86 motherboards and SBCs for use in light industrial and special OEM environments including voice messaging, medical electronics, industrial control, security & surveillance, telecommunications, ATM/POS digital signage, gaming, and kiosk systems. Wide variety of standard and custom-designed boards, including ATX, microATX, Mini-ITX, and small form-factor SBCs. ITOX provides motherboards incorporating legacy ISA slots, along with PCI, PCI-X, and PCI Express bus support. <http://tinyurl.com/eca-dfi-itox>

[Eurotech](#) — ARM, PPC, Intel, and XScale, single board embedded system computers, flat panel display interfacing capabilities, application-ready Single Board Computers (SBC), and ubiquitous wireless gateway products for industrial and transportation applications. Support for Windows, CE, Linux, and other RTOS packages. Cellular Wireless Data Routers w/GPS options, Development Platforms. Custom capabilities specializing in low power applications. <http://tinyurl.com/eca-eurotech>

[IEI Technology Corp.](#) – A leading industrial computing service provider integrating computing platforms and customization services. IEI supplies hundreds of industrial computer boards, systems and peripherals in thousands of customer applications, and supports OEM/ODM services to reduce customers' engineering effort and accelerate the product development process. <http://tinyurl.com/eca-ie1>

[Insyde Software Corp.](#) - A leading global provider of system firmware and software engineering consulting services for companies in the notebook, desktop, server, and embedded systems. Insyde Software develops traditional and emerging firmware, supporting BIOS along with new standards Including UEFI/EFI Framework. <http://tinyurl.com/eca-insyde>

Kontron — Embedded Single Board Computers, Computer-on-Modules (COM Express, ETX, XTX, NanoCOM), ATCA, microTCA, cPCI, VME, and other Distributed Processing Platforms, and application ready systems. Custom integration and racking services for high-availability systems.

<http://tinyurl.com/eca-kontron>

Ricoh — Ricoh offers long-life motherboards, contract manufacturing and design services, vertically integrated electronics assembly and manufacturing, plastic injection molding, metal fabrication, system integration, repair depot services, global distribution and product management services.

<http://tinyurl.com/eca-ricoh>

Premio, Inc — Beyond Integration & Design. Based in the US with mfg. locations in CA, IL, and Malaysia, Premio offers a total solution package including engineering, design, Energy Star testing services, logistics, supply chain and manufacturing, and industry leading global automated web & business tools for their customer's to view, change, and manage their product throughout - end to end. Women and Minority Owned. www.premioinc.com
